

Leaving Cert HL Revision Planner 2026

How to Use This Planner

Each Sunday, a topic is listed. That is your focus for the week.

From Monday to Thursday:

- Revise that topic using textbook questions
- Practise past exam questions on that topic
- Review notes and fix gaps

At the weekend, complete the past paper listed.

That's it! No wondering what to study. No wasting time planning.

If you stick to this schedule, week by week, you will revise the full course in a structured, manageable way, and be exam-ready by June.

Top Priorities

As you work through each week, write your weakest areas in the Top Priorities section. Be specific. This will help you clearly see which topics need extra attention closer to the exam.

Need Extra Support?

Links to upcoming revision courses are included in this document. You can see what topics we're covering in our Monday and Wednesday lessons.

Links to past papers are included - thanks to [Mr Nicholas Maths](#)

Final Word

Higher Level Maths is challenging, but it is absolutely manageable with consistent effort and regular exam practice.

Stick to the plan. Trust the process. Show up each week. By June, you'll be ready.

Wishing you every success,

Anita Collins
